## Attention Parents/Guardians:

**The Dental Preventive Clinic will be starting at Georgetown Elementary School mid October 2018**

**Purpose of Dental Clinic:** Screen children to assess risk of oral disease; provide oral health education, topical fluoride, scaling/polishing and sealants, according to your child's individual needs.

**Screening:** All children will be seen for a two-minute screening to determine their risk of oral disease. If you do not wish your child to have this dental screening, please notify the school secretary or classroom teacher.

**Consent:** After the screening, all children will be given a consent form which will be necessary for you to complete and return before services are provided.

**Fees:** There is no cost involved as the preventive services are covered by the Children's Dental Care Program.

**Contact:** If you have any questions about the program, please contact the dental staff at the School or the Dental Public Health Clinic in Charlottetown at **368-4918**.

**Further Information:** Please note that only preventive services will be provided and the screening is not a substitute for an annual dental examination. It is strongly recommended that parents take their children to a dentist for regular examinations and treatment. The Children's Dental Care Program assists with the cost of basic dental care delivered in private and public dental offices for children from ages 3 -17.
